Do you offer a kit for the whole car ? Not exactly. If we have all the Master and Junior kits for your model you can get about 85% in one easy purchase. Misc items not covered by a Master kit heading can be purchased in addition.

How accurate are the kits ? Most kits are right on. Sometimes we do have to make substitutions in order to be practical, fasteners are costly to manufacture and it makes sense to substitute if a closely similar part is already in the warehouse.

Do you offer front end kits ? No. Instead AMK offers a more accurate and comprehensive solution: the "Master Body" kit.

Should I buy assembly manuals ? Absolutely ! They are like the instructions for your AMK kit. Plus they provide torque specs.

I do not see my headmark ? The headmarking identifies the manufacturer and grade. Car companies source fasteners from multiple suppliers, especially heavily used items. AMK has reproduced the most popular old markings and has registered them as our trademarks. If the kit does not include the marking you want then check our bulk section because we may offer the same part with other markings. As a last resort you could replate the originals you wish to preserve.

Do chrome valve covers use chrome bolts ? The factory did not use chrome bolts for valve covers.

Why do exhaust manifold bolts rust ? From the factory, the bolts, like the exhaust manifolds are plain finish.

What is the best way to place my order ? #1 AMK shopping cart www.amkproducts.com #2 fax 800-518-2871 (order form is online or back of catalog), #3 phone 540-662-7820 M-T 9-3 PM, F 9-11 AM (note lunch break is 11:45 - 12:45 daily).

What payment is accepted ? Visa, MC, money orders (US Postal or Western Union), personal checks drawn on US banks only - orders are held until check clears, COD paid with a US Postal or Western Union money order - provide a fax number.

What information is needed when placing my order ? #1 AMK part numbers, #2 shipping address, #3 billing address - please make sure you have the correct billing address otherwise costs increase, #4 phone number, #5 clear hand writing.

When will my order ship ? Depends on size of order and time of year. Expect 7-30 days Jan-Aug, 1-7 days Sept-Dec.

How will my order ship ? Our standard method of shipping is UPS Ground or Priority Mail. We also offer UPS 3 Day Select, 2 Day Air, Next Day Air. Transit time to Eastern US is 1-2 days, Midwest 3-4 days and 5-6 days to the West.

Why is no one answering the phone ? Our staff works hard 40 hrs per week producing fastener kits and filling orders. Restricting the phone to 22 hrs allows us time to completely focus on production. Lunch break is 11:45 - 12:45 daily. Also AMK Products primarily ships to distributors. We maintain retail phone sales in order to stay connected with our customers.

Can I pay to rush my order ? Orders are processed first come first served. Expedited shipping methods are available.

Can I have my order sent Priority Mail ? Yes in most cases. You must have a Mail Receptical Box.

I do not see my model ? We have meticulously researched many popular models and offer thousands of fastener kits and are working on additional kits, meanwhile we recommend that you use our bulk section or pick a similar model.

What does SEMS mean ? It stands for "screw and washer assembly". The original manufacturer also used it as a marking.

Where are AMK fasteners made ? About 95% of our fasteners are made in USA by quality certified manufacturers. AMK supplies the manufacturers with the tooling needed to form the head and markings. Beyond the basic dimensional and strength requirements AMK imposes very stringent aesthetic standards. This makes for a huge difference in overall quality.

How are fasteners made ? Most fasteners are cold formed from wire by cold heading machines. During the winter months cold heading shops require little heating because so much heat is generated by the metal as it changes shape ! Threads on most fasteners are "rolled". The threaded area is made undersize during forming and the rolling process displaces material.

What is phosphate ? It is the application of a crystal structure on the surface of steel. In the automotive industry phosphate is used to retain oil which provides light corrosion protection or it is used as a primer base for other coatings.

What is plating ? Plating is the application of another metal onto the surface in or to prevent corrosion or provide an appearance. There are two main types of plating. Most fasteners are electroplated where another material such as zinc or cadmium is deposited on the surface in a tank containing electrolyte liquid, a cathode (parts), anode (material to deposit), electricity and controls. Parts that are subject to possible hydrogen embrittlement damage from the electroplating process are often instead "mechanically" plated. This process basically blasts the fasteners with the plating material until sufficient coating thickness is achieved. Zinc is usually used. A mechanical finish can be identified by the texture and somewhat dull finish. Mechanical plating is often used on thin spring steel fasteners such as wave washers and stamped nuts.

How do I install a rivet nut ? If it is a hex body nut, just place it in the hole and install the fastener, the hex body prevents rotation as the rivet nut body collapses. For round rivet nuts see the installation picture shown on page 63. Stack the parts onto the screw in the order shown and spin the rivet nut onto the screw. Insert the assembly into the hole and hold the nut firmly with a wrench as you tighten down the screw with an allen wrench until the rivet nut body is totally collapsed.

Environment

We are happy to be alive on this tiny planet and wish to help take care of it.

Clean energy is needed in the Eastern US for two reasons: mountain top removal and air pollution. The process well described in the documentary film "Mountain Top Removal" levels mountains and releases toxins into the groundwater and creates a permanent eyesore. Left over rock has buried hundreds of miles of streams in a process known as "valley fill".

Toxic emissions from coal burning include: small particles (soot) that cause health problems such as asthma, sulphur dioxide causing haze, acid rain that is killing our oceans, mercury that poisons our fish and 40% of U.S. CO2 emissions !

Today there are many clean energy technologies ready to lead us into the future !

Nuclear, solar, wind and geothermal solutions produce clean electricity while keeping our skies clear and water clean. Solar and geothermal sources can also provide big energy savings by heating or cooling water. Energy demand itself can be dramatically reduced by installing programmable thermostats, photo/motion sensor light switches, updating lighting, HVAC equipment, minimizing HVAC outside air intake and adding inversion fans to move heated air down from the ceiling.

The AMK facility is a small example.

We generate 100% of electricity and collect 100% of water onsite.

New T8 lighting uses 55% less electricity and geothermal heat pumps replaced our old energy hog units.

The company gofor truck is a Ford built 100% electric Ranger EV !

**30KW
Solar Power Plant**

Solar output is highest when electricity demand is highest during the summer !

Excess electricity is automatically distributed to nearby users.

Because the energy is produced locally where it is consumed the need for long distance transmission lines is eliminated.

Green Thoughts

1. Restoring and driving a vintage car is better for the environment than manufacturing a new one because a huge amount of energy is saved and CO2 emissions prevented.
2. Reusing is the best form of recycling, AMK Master kit boxes are great for reuse.
3. Worldwide most steel products including fasteners are made from recycled material !
4. AMK fastener kit bags are #4 and can be recycled at your grocery store together with grocery bags.
5. AMK practices "carbon conscious shipping". Our choice both saves the customer money and reduces CO2 emissions.
